

Bertram Birk

General Manager:

Buslink Queensland

Bertram joined Buslink early in 2014 following an extensive career specialising in people, asset, stakeholder and change management.

His previous roles have included executive positions in the water and electricity industry with the Power and Water Corporation (PWC) of the Northern Territory. PWC is responsible for providing power, water and sewerage services to all residents in the NT.

At PWC Bertram represented the business on various boards and associations at the national level and was also tasked with leading the business during Emergency Management situations including cyclones and floods.

Experience gained at PWC has proved beneficial to Buslink and provides the group with a 'fresh voice' on bus related matters.

With tertiary qualifications in both mechanical and electrical engineering, a Business degree and MBA from Melbourne University, Bertram is a Fellow of the Australian Institute of Company Directors and cites continuing professional development as a key interest.
